

## About the Program

Crowder College established its English Language Institute in 1997. Since that time, the program has served students from several countries around the world. The Crowder program is intensive, providing dedicated students with the opportunity to progress in the study of English as quickly as possible.

Practical, hands-on opportunities to interact with others while learning English

Language study at the Institute provides personalized attention in its small class setting. Students are able to get to know one another personally, which facilitates and enhances their language learning experience.
