ACCESS TO RECORDS INFORMATION 10/93

“The Family Educational Rights and Privacy Act of 1974”, Public Law 93-380 as amended and signed into law by President Ford on December 31, 1974, states that enrollees have the right to examine confidential files. It also states that they may waive this right if they do so desire.

The law provides that references may be either confidential or non-confidential at the option of the registrant. The registrant has the option to inspect the references in a non-confidential file. Confidential references are those which the registrant has waived the right to see.

Please consider the following in making a decision to have confidential or non-confidential references.

- 1. School officials prefer to see confidential references, believing the references are more frank in such credentials. The limited number of studies which have been made of confidential vs non-confidential references indicate a preference of both hiring officials and college faculty for confidential or enclosed references.**
- 2. Registrants should be most selective in asking persons to be references for them. The persons selected should know the registrant well and be able to state facts and competencies of the registrant.**
- 3. Writer of references will be informed at the time of writing that the reference is confidential or that the registrant will be permitted to see the reference.**

Crowder College Mission Statement

Building a civil, serving, literate, learning community of responsible citizens.

Crowder College Nursing Mission

The nursing program of Crowder College aims to provide a quality nursing education which will enrich and inspire personal growth of citizens in the four state area and beyond.

Crowder College Nursing Philosophy

Definition of a Nurse

A nurse is a professional who subscribes to high ethical standards to provide quality, safe, and patient-centered care. The nurse uses clinical judgment which is built on evidence-based practice. A nurse serves as an advocate for individuals, families, and communities. A nurse is a lifelong learner, seeking excellence in autonomous and collaborative practice.

Role of the Associate Degree Nurse

At the completion of the associate degree program, the nurse is able to provide safe and competent care based on a firm foundation in current evidence based practice. A generalist nurse provides compassionate and collaborative care to individuals, families, and communities in a variety of settings. The roles of the nurse include client advocacy, health promotion, disease prevention and care of the sick. Nurses also participate as leaders in shaping health care policy and quality of care.

Nursing Education Philosophy

A conceptual framework will be utilized to teach patient centered care that is evidence based with a focus on safety and quality. The Crowder nursing faculty ascribe to adult learning theory in a conceptual learning environment. The adult learner:

- is self-directed and autonomous
- utilizes knowledge and life experiences
- is goal directed
- is relevancy-oriented
- is practical
- encourages collaboration

Conceptual learning centers on understanding broader principles or ideas that can be applied to a variety of health and illness exemplars. Conceptual learning is a means to develop deeper learning and clinical reasoning and judgment.

In addition, our nursing graduates will have the option of pursuing a baccalaureate degree in nursing through a seamless transition into other educational programs.
