

DRAFTING

WANT TO BE CAREER READY IN COMPUTER AIDED DRAFTING?

Certificate

Computer Aided Drafting Technician

This certificate prepares students to enter a career in drafting technology with a basic skill set that will provide entry level knowledge of basic engineering, print reading, assembly and technical drawings. Course offerings make it easy to complete the certificate in two semesters. This program is designed for working students or someone wanting training to advance their employment opportunities. All drafting classes are designed to prepare the student for employment opportunities in today's demanding field of drafting and engineering drawings. Crowder's courses are created based on local industry request and advisement. Students will explore many new versions of software to align with the industry standards.

WHY CROWDER?

- Experienced, friendly, staff are trained to provide financial aid assistance, academic and career advising, and enrollment assistance.
- Instructors are highly qualified and experienced in their career field.
- Small class sizes
- State-of-the-art equipment for student use.
- Courses are sequential allowing students to complete quickly.
- A+ Program Eligible
