

PRACTICAL NURSING

NEW PRACTICAL NURSE PROGRAM *Certificate*

Crowder College offers a 56 credit hour program on the path to become a licensed practical nurse. This is a selective admission program offered at the Nevada Instructional Center. The program prepares graduates who demonstrate entry-level competencies as a Practical Nurse to enter the high demand field of nursing and healthcare.

WHY CROWDER?

Crowder College has been offering healthcare programs for many years. Operating the Practical Nurse program at our Nevada location seemed to fit the needs of the community. The program will be offered in a two-semester format providing those who complete the opportunity to take the licensure exam and possibly continue in the Registered Nurse program at Crowder.

The program is fully approved by the Missouri State Board of Nursing.

The experienced staff and dedication of our faculty is crucial in a program such as this.
